Development Environment Setup

Requirements

i) compiler / interpreter - converts H.L to machine level language

ii) Editor - source code text editor
   └> File extension => .py
                        .java

iii) Debugger - helps to run line by line slowly

iv) project setting

   └> IDE (Integrated Development Environment)

v) standard library

Important aspects ─┌ Find compiler / interpreter
                   └ find IDE
